Art Unit: 2183

1. Claims 1 and are presented for examination.
2. Claims 3-11 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 9/2/2004.
3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
4. Claims 1-2 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
5. Applicants' use of the phrase, "A logic integrated circuit **such as** a field programmable gate array having a CPU core" renders applicants' claims indefinite. The test for definiteness under 35 U.S.C. 112, second paragraph, is whether "those skilled in the art would understand what is claimed when the claim is read in light of the specification." *Orthokinetics, Inc. v. Safety Travel Chairs, Inc.*, 806 F.2d 1565, 1576, 1 USPQ2d 1081, 1088 (Fed. Cir. 1986). While there is language in applicants' specification which might indicate applicants intended "field programmable gate array having a CPU core" as a claim limitation there is other language in the last paragraph of applicants' specification immediately preceding their claims which indicates they did not intend the language to be limiting. Therefore, it is not possible to determine definitely what applicant is claiming.
6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 2183

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claim 1 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Glickman (WO 91/11765).

8. To the extent possible given applicants' indefiniteness in their claim language, the examiner has determined Glickman teaches the limitations of applicants' claim 1.

9. Claim 1 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Pappalardo et al. (EPO 0 926 589 A1).

10. To the extent possible given applicants' indefiniteness in their claim language, the examiner has determined Pappalardo teaches the limitations of applicants' claim 1.

11. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

12. Halverson et al. (Patent No. 5,574,930).

13. Burke (Patent No. 6,704,816).
